This looks fine. Steve, I sent an email to Sam right after the call and just texted him asking if he can confirm for Wed. I would suggest that we proceed as discussed. Even if Sam cannot attend, the clock is ticking and we need to have the discussion with industry. I will let you know as soon as I hear from Sam.

Ahh! Just got a text from him saying yes, so we will have Sam with us. Yeah. Thanks

Guy/Wren,

This is the email I plan to send to the industry folks. Please let me know ASAP if you're OK with it.

Thanks,

Steve

All,

I am very sorry for the last minute notice, but we discussed schedule with EPA on today's phone call and things need to move faster than I realized based on that schedule. So, we are going to have a meeting here in Austin on July 12th at 10:00 AM to lay out EPA's plan for moving forward with a final BART FIP and the TCEQ's plan for moving forward after the FIP is final. As I have discussed with most of you, we have been discussing with EPA what a trading

program to address BART and reasonable progress might look like. At Wednesday's meeting, we will give you as many details as we can regarding how we plan to move forward, but as you can imagine, there are still a number of details that need to be worked out. We are planning for the agenda to be very simple with as much time as possible for you to ask questions.

Keisha will send out a meeting notice later with the details regarding the meeting location. Please forward this email and the meeting info to other folks within your organizations. I would also appreciate it if you would let Keisha know who will be attending the meeting. Please feel free to call me if you want to talk before the meeting.

Elizabeth – will you please forward this and the meeting info to the Oklaunion folks.

Jessica – I will call you later. I don't think you need to attend this meeting, but didn't want to leave you out.

Thanks,

Steve
